Why the Human Family is Right-Handed and Left-Legged. The reason why men are as a general rule right-handed is thus ingeniously gives: Primitive man, being by nature a fighting animal, fought for the most part at first with his great canine teeth, his nalls and his fists, till in process of time he added to these early and natural weapons, the further persuasions of a club or shillalah. He also fought, as Darwin has conclusively shown, in the main for the possession of the fembrase of his kind, against other members of his own sex and species. And if you fight, you soon learn to protect the mest exposed and vulnerable portion of your body. Or, if you don't natural selection manages it for you, by killing you off as an immediate consequence. To the boxer, wrestler er hand-to-hand combatant, that most vulnerable portion is undoubtedly the wherever they desire so to do. They employed the left arm chiefly to cover There have been too many profits made that specially vulnerable region. And their business into this new stock comwhen weapons of offense and defense pany they do so for the purpose and right hand that grasps the spear or closer relations with the actual purchassword, while the left holds over the ers of the books and give them the benheart for defense the shield or buckler. efft of the lowest possible prices. To in civilized life takes its beginning. At reduced prices, a greater economy first, no doubt, the superiority of the in manufacturing the books and right hand was only felt in the manuer in conducting the business must knife made the nerves or muscles of the several expensive establishments.

running in circles to the right. So the houses which have formed the new co keep to the right, and this appears to aim to make it for the interest of the be almost universal. It is more natural public to use them. to bear to the right. Of a large numper cent of the females were aware only way in which this can be acc inconsciously in walking. Crowds tend to bear to the right. The left leg being school books have ever been bought. the stronger, it is more readily brough into action. Hence, soldiers start off is placed into the stirrup of the saddle or step of bleycle when mounting. So and telling them to walk straight, the "savage of extraordinary ferocity." he left was longer, in 21.5 per cent. to relax. larger, and at the instep 43.5 per cent. served that the left foot is more frequently the larger in the male than in variable. Man, being naturally or arti- tions. ficially right-handed and left-footed, tends unconsciously to bear to the right;

When the apple-ckeeked Sandy Ridge girls and boys cluster around Aunt Jinsey now to hear her tell the marvelous story of her tour, and when she has graphically described the oting and the roaring, the whirring and the buzzing, the shaking up and the shooting wildly through space, they always ask breathlessly:

"And what did you do, Aunt Jinsey?" She wipes her face with her clean checked apron and, drawing a deep breath, replies: "Law, law, my precious uns I jist hilt my holt an' promussed the Lord en fast ez I could that ef He'd git me off safe I'd nuver be kotched agin hitched onto no ongodly scritchn' lokermoter!"-Detroit Free Press.

THE ENGLISH LANGUAGE.

Without Participles and the Like It Con tains Forty Thousand Words.
An interesting question suggested by an ancient waif of a book is the number an ancient walf of a book is the number of English words now existing. Considerable difference of opinion exists on this point. Mr. George P Marsh, an American author of repute, in his "Lectures on the English Language," estimates that the number (in 1861) "probably does not fall short of 100,000;" and large additions, especially in art and science, have come into use since that date. Other writers, bowever, come to a different conclusion, and think A strange scene occurred the other that 40,000 would include the whole. It from in jumping. In the experiments of Mr. G. H. Darwin, blindfolding boys ized individual described as a bona fide —participles and the like—are to be

taken into account, it will swell the pairs, with the result that in 44 percent. when his stern gaze was suddenly seen ten. There is also redundance in other forms. In one of Todd's editions of Dr.
